End Result

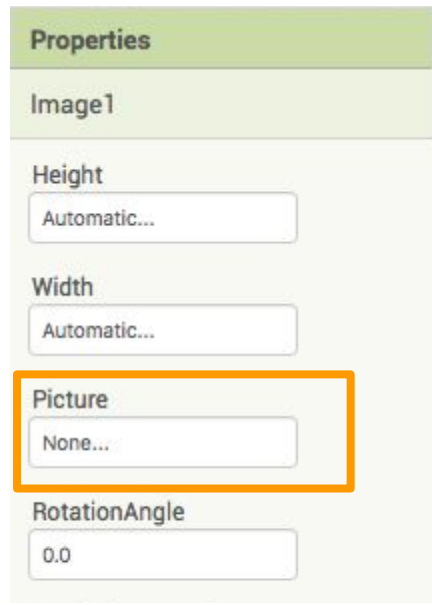

1. Click and drag the image box to the phone on the screen
2. Click and drag the button box to the phone
(repeat this step 1 more time)

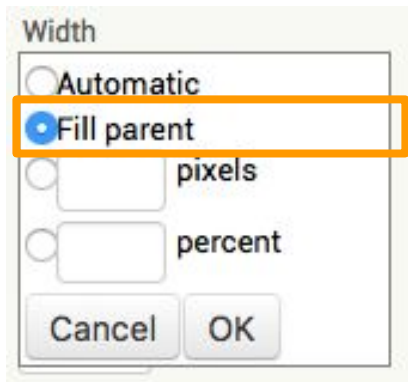

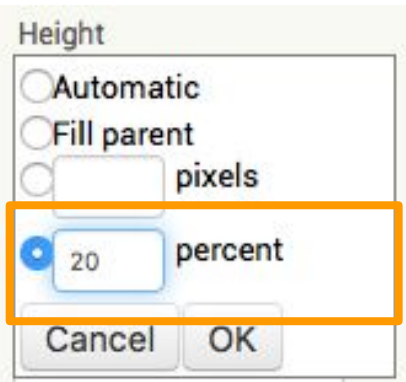

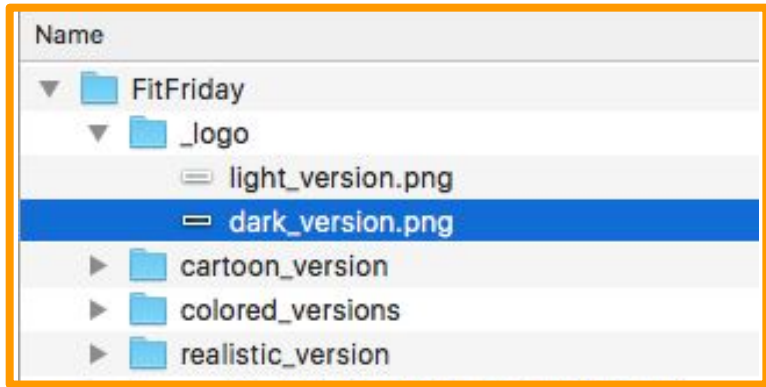

1. Click on button 1 in the component window
2. Click on height and type 20 in the percent box.
3. Do the same thing for the second button.

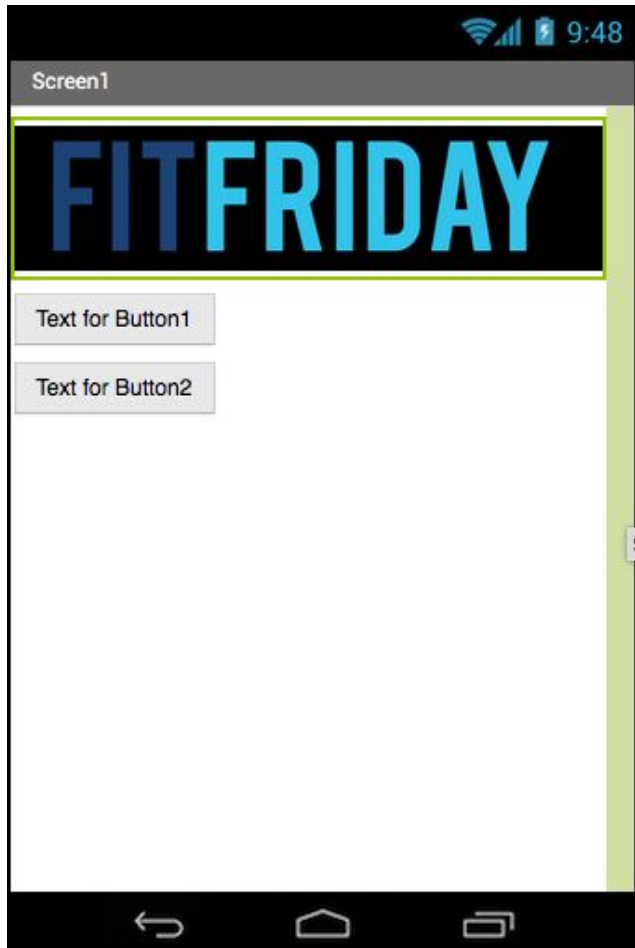

1. Click on width and choose Fill parent
2. Repeat the step for the other button.

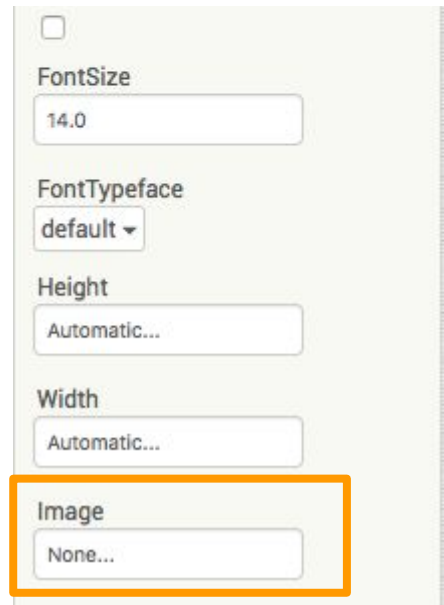

1. Click on “image” in the components.
2. Choose “picture” in the properties.
3. Click “upload file”.
4. Click browse to get the file.

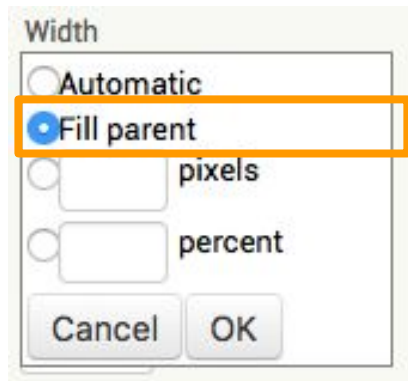

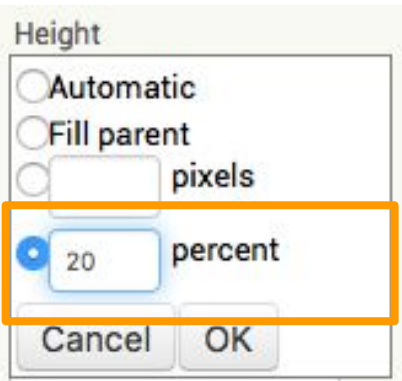

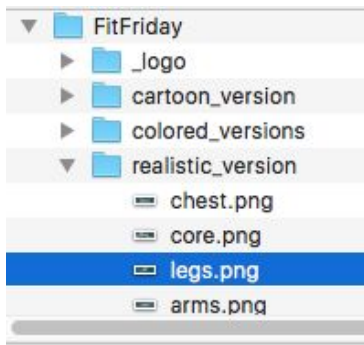

1. Go into the FitFriday folder.
2. Go into “_logo” folder
3. Pick the version you want
4. Click OK
5. Put in 20 percent for the height
6. Choose “Fill Parent” for the width

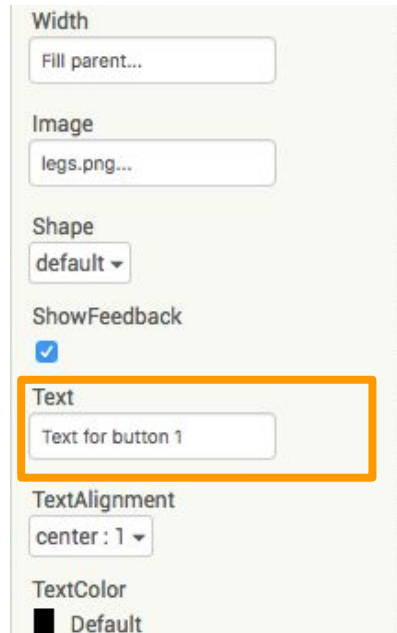

What it should look like

1. Click on “button 1” in the components.
2. Choose “image” in the properties.
3. Click “upload file”.
4. Click browse to get the file.

1. Go into the FitFriday folder.
2. Pick the version you want
3. Choose the image that you want
4. Click OK
5. Put in 20 percent for the height
6. Choose “Fill Parent” for the width

1. Make sure you are on the “button” components
2. Find and Click on Text
3. Delete the text and press enter
4. The result should look something like this

End of Designing

You should end up with something like these **three pages**.

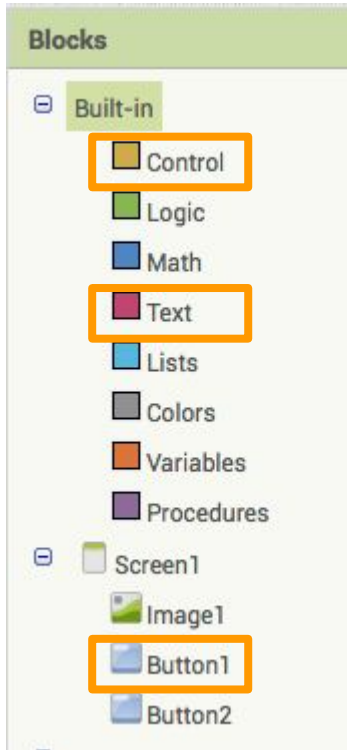

Programing

The one that will link your pages together

1. Go back to the home page
2. Click on “block”
3. It should show you this screen

1. Click on control and find the one with “Open another Screen Screen Name”, drag that onto the white screen
2. Click on text and find the first one, drag that onto the white screen
3. Click on Button1 and find the one with “when Button1 .Click do”, drag that onto the white screen

What is this?

When Button 1 is being click, do....

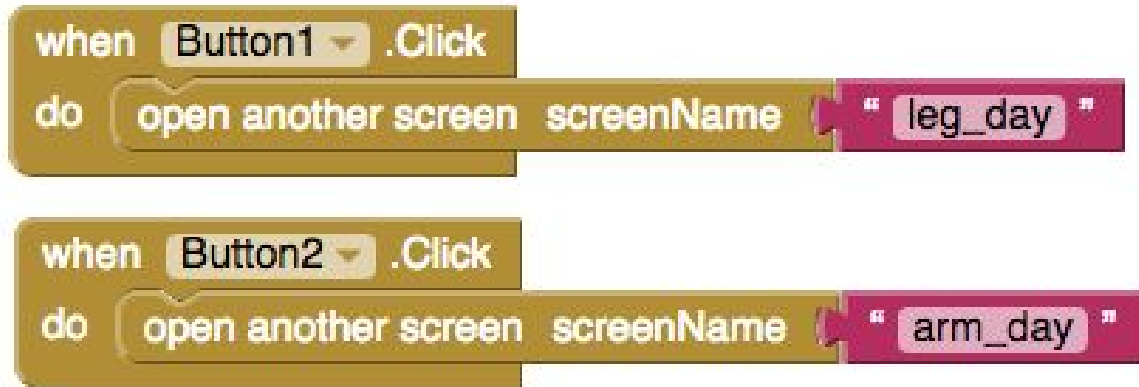

When the above statement is true,
perform this action

The name of your
screen

The Blocks for the home screen

The Block for Sub Page 1

The Block for Sub Page 2
